Subject: Info request from Spain´s User
Importance: High

Good afternoon,

Please, if this enquiries is not for you or your departament, please, let me know whom send this email to.

I am a new owner of a really wanderfull Silver Shadow I, first registered in the UK in 01/01/1968 with the number SYY 282 F and chassis number is SRH3430

I wonder if you please, kindly could give me some information about this car as i would like to complete its own history (date on wich was started to build, date of ending, and all as much as possible to find.

Also, here in Spain is hard to find information about your so nice cars. Here, Castrol has been bought by BP and they do not deliver any more the Castrol RR363 for the hidraulic and brakes systems. Is there any solution for this early Shadow to use other more conventional and easy to find fluid as DOT4 or any other else?

Also, please, could you please inform me if this car is able to use unleaded 95 octans Fuel? In Spain we have not more leaded Fuel available in most of petrol stations, and i am in doubth about lead aditives in market.

Thank you very much for your attention and support.

Best regards from Spain

Miguel A. Garcia Sanchez
