

YOU DON'T NEED TO BE THE PRESIDENT
TO OWN A BULLET-PROOF VEHICLE

Introducing the world's first personal protection Luxury Utility Vehicle (LUV), the Allure & S5 Concepts.

The LUV Concepts are vehicles that both offer the exquisite balance of premier exclusivity and latest in personal protection technology. They were conceptualized as revolutionary vehicles that would offer executive-level purpose with the plush comfort and style of a private jet, all

while providing maximum security features like bullet proofing and air-purification, protecting from outside harm.

Built on a Rolls-Royce aluminum space frame chassis, the Allure & S5 will offer exceptional body stiffness for optimum handling and comfort. Air suspension helps deliver the expected smooth ride that could only be found in a vehicle of such high caliber.
